DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "108as been used to designate both a deflector pate and a leg of a T-connector in Figure 2 and paragraphs 15-16 of the specification. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-3 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Thedford et al. 4,928,459, cited by applicant.

Thedford et al. discloses a conveying structure for a cotton harvester row unit having:

- an upright fore-and-aft extending cotton receiving structure (Fig. 2)

Application/Control Number: 10/644,317 Page 3

Art Unit: 3671

- a floor structure (Fig. 1)

- a material discharge opening (60)

- a first upright tube (78) with lower air outlets (bottom outlet 82)

- a second upright tube (88) with lower air outlet (bottom of 88)

- a source of air under pressure connected to the upright tubes

The air from the first tube moves cotton from a forward area towards the discharge opening (Column 6, line 47-48). The air from the second tube sweeps the floor near the outlet (Fig. 5)

Regarding claim 2, the tubes are frame members since they are on the frame.

Regarding claim 3, the source of air under press includes air feed structure (72, 84, Column 6, lines 49-52) above the row unit (Fig. 1).

Regarding claims 7-8, the second tube is offset inwardly from the first tube and aligned with a side of the material discharge opening (Fig. 1). The second tubes outlet opens rearwardly.

Allowable Subject Matter

4. Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 9-20 are allowed.

Art Unit: 3671

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
